📄 SUMMARY

B.Tech Computer Science student at Central University of Jammu with strong fundamentals in Data Structures, Operating Systems, and DBMS. Passionate about building scalable web applications and exploring AI/ML. Experienced in developing real-world projects using React, TypeScript, and Python, with a focus on clean code and problem-solving.

🧠 SKILLS

Programming Languages: C, C++, Python, JavaScript, TypeScript

Frontend Development: HTML5, CSS3, React, Next.js, Tailwind CSS

Tools & Technologies: Node.js, Express.js, Git, GitHub, PostgreSQL, MySQL, REST APIs, Vercel

Core Computer Science: DSA, OS, DBMS, OOP, Machine Learning, Gen AI, Prompt Engineering

🌐 LANGUAGES

English: Professional working proficiency

Hindi: Native proficiency

📜 CERTIFICATES

Prompt Engineering for ChatGPT – Vanderbilt University: Issued Nov 2025 | Focus: LLMs, prompt design, AI workflows

Generative AI: Prompt Engineering Basics – IBM: Issued Sep 2025 | Hands-on prompt techniques for AI systems

Introduction to Artificial Intelligence – IBM: Issued Aug 2025 | Core AI concepts and applications

Generative AI: Introduction and Applications – IBM: Issued Aug 2025 | Overview of generative AI tools and use cases

🎓 EDUCATION

Central University of Jammu, B.Tech in Computer Science Engineering

08/2024 – 06/2028 | Jammu, India

- Strong foundation in Data Structures, Operating Systems, and DBMS
- Coursework includes Programming, Algorithms, and Computer Fundamentals
- Actively building real-world projects in Web Development and AI/ML

Birla Open Mind International School, Senior Secondary (Class 12)

04/2023 – 03/2024 | Jammu, India

KV No. 1 Gandhi Nagar, Jammu, Secondary School (Class 10)

01/2012 – 04/2023 | Jammu, India

📁 PROJECTS

Cognify 🌐, Student Performance Prediction Platform | Next.js, TypeScript

GitHub : <https://github.com/Tanmay2006-Tech/Cognify> 🌐

Live : <https://cognify-liart-five.vercel.app> 🌐 🔗

- Built a web platform for predicting student performance using data-driven analysis
- Implemented study planning, progress tracking, and performance visualization features
- Developed scalable full-stack architecture using Next.js, PostgreSQL, and Prisma

Upchaar 🌐, Healthcare Web Application | TypeScript

GitHub : <https://github.com/Tanmay2006-Tech/Upchaar> 🌐

Live : <https://upchaar-nine.vercel.app> 🌐

- Built a healthcare-focused web platform for improved accessibility and user experience
- Implemented modern frontend practices using TypeScript
- Designed clean UI with focus on usability and performance

NullTrace 🌐, Infrastructure Monitoring Platform | React, TypeScript

GitHub : <https://github.com/Tanmay2006-Tech/NullTrace-Final> 🌐 🔗 Live :

<https://null-trace-final-nulltrace.vercel.app> 🌐 🔗

- Developed a full-stack platform for real-time infrastructure monitoring and incident tracking
- Implemented log analysis, service health monitoring, and automated issue insights
- Built responsive dashboards and scalable backend workflows using React and Express

EchoForge-AI 🌐, AI Content Generation Platform | JavaScript

GitHub : <https://github.com/Tanmay2006-Tech/EchoForge-AI> 🌐 🔗 Live :

<https://echo-forge-ai.vercel.app> 🌐 🔗

- Developed an AI-powered platform for intelligent content generation workflows
- Implemented responsive UI and scalable frontend architecture using JavaScript
- Focused on performance optimization and clean user experience

PROFESSIONAL EXPERIENCE

Google Student Ambassador,

Google Gemini

05/2026 – 09/2026 | Remote

- Selected as a Google Student Ambassador representing Central University of Jammu.
- Organized AI and Google Gemini awareness initiatives for students.
- Created technical content and promoted Google AI tools.
- Collaborated with student developers and campus communities.

Frontend Developer Intern,

Ladybird Web Solution Pvt. Ltd.

06/2026 – 06/2026 | Remote

- Developed responsive web pages using HTML and CSS.
- Built reusable UI components following modern web standards.
- Improved website responsiveness and cross-browser compatibility.
- Collaborated with mentors on frontend development tasks.

Machine Learning Intern,

Intern Career Path

05/2026 – 06/2026 | Remote

- Built machine learning models using Python.
- Worked on data preprocessing and model evaluation.
- Strengthened AI and ML fundamentals through practical projects.
- Improved problem-solving and debugging skills.

Python Development Intern,

ShadowFox

07/2025 – 07/2025 | Remote

- Developed and implemented Python-based solutions for real-world problems
- Strengthened problem-solving and debugging skills through practical tasks
- Wrote clean and efficient code following structured programming principles
- Gained hands-on experience in a professional development workflow
